

## **Christine Frank**

Owner, Twin Cities Industrial Control (TCIC)

---

Christine brings more than 20+ years of experience in Industrial Automation, Process Control and Building Automation, working in the areas of Sales, Marketing, Product Management and Business Development.

For the past 9 years she has been focused on helping companies bridge Information Technology (IT) and Operational Technology (OT) for proven results in IoT, IIoT and Industry 4.0. She has an extensive knowledge of industrial control technologies such as programmable logic controllers (PLC's), OPC UA, SCADA hardware and software, Industrial fieldbuses, Industrial ethernet networks, and machine & process safety equipment and sensors.

Christine was most recently the Global Director of Channels for DataRPM, a Progress company. Prior to that she was the Director of Worldwide IoT Industry Partnerships with HP Enterprise.

Other prior companies:

- Dell
- Transition Networks
- Advantech (B+B)
- Siemens
- SICK

Her additional areas of experience include:

- Alliance partner programs
- Product consultant
- Distributor/channel development
- Cross-functional team management

She holds a BS in Industrial Technology from Metropolitan State University and a degree in Fluid Power from HTC, Eden Prairie, MN. She and her husband live in Woodbury, MN with their two daughters.
